MEMORANDUM FOR Commander, Huntington District

SUBJECT: Supplement No. 3, Master Plan, Design Memorandum 10B,
Summersville Lake, Gauley River, West Virginia

1. Authority: ER 1130-2-435, paragraph 7.b., Preparation of Project Master Plans, dated 30 December, 1987. One copy of this approved supplement will be submitted concurrently to ORD and OCE for 30 day review for comment.
2. Exhibits enclosed:
 - A. Project map.
 - B. Topographic map of Long Point.
3. The purpose of this Supplement is to request approval for the development of an archery range at the Long Point area for the use by the public. The range will be a cooperative project between the West Virginia Department of Natural Resources and the Gauley River Bowhunters Association. WVDNR currently has a license to manage this area for wildlife and to provide facilities for hunters and fishermen. Costs for construction and maintenance will be shared by WVDNR and the bowhunter organization.
4. The range will utilize approximately 10-15 acres and will be located about 1000 feet from the Long Point Campground (privately managed), and an equal distance from the Summersville airport (exhibits A & B). The design will consist of a 24 target loop about 1000 yards in length, a multi-target 50 yard practice range, a parking area, vault restrooms, and a shelter. Part of the range and all support facilities will be handicap accessible. All developments will be designed to national standards with safety as the first priority. Prior to construction, WVDNR will provide a site plan of the range to be reviewed by the district Safety Office. Access to the site will be from U.S. 19 and Long Point access road. The existing road access to the southern part of Long Point will not be affected by the range.

CEORH-PD-B (1110-2-240a)

SUBJECT: Supplement No. 3, Master Plan, Design Memorandum 10B,
Summersville Lake, Gauley River, West Virginia

5. This proposed public facility will increase utilization of the Long Point area, provide a much needed practice range for area archers, and will provide thousands of man-days of recreation. Approval is recommended.
